Atiq Gauri

Full Stack Developer & Concept Designer

gauriatiq@gmail.com

Full Stack developer with C++ experience, I have developed cross-platform electronJS and node.js application from scratch, including database, CI/CD, dockerization and C++ backend. Server side I have made several APIs with express.js, node.js and many BaaS projects with firebase and netlify. Other skills include unit testing, basic machine learning with python and concept design.
